PROFESSIONAL SUMMARY

Full Stack Developer with 1 year of experience in web application development using React.js, Next.js, Node.js, TypeScript, Prisma ORM, and REST APIs. Skilled in responsive UI development, database integration, JWT authentication, and Role-Based Access Control (RBAC). Experienced in AI-assisted software development using ChatGPT, Claude, GitHub Copilot, Gemini, OpenAI Codex, and Google Antigravity for coding, debugging, and problem-solving. Passionate about AI application development and building secure, scalable, and user-friendly web solutions.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
Backend:	Next.js, Node.js, REST API's
Databases:	PostgreSQL
Tools:	Git, GitHub, GitLab, VS Code, Postman, Linux CLI
Soft Skills:	Problem Solving, Cross-functional Collaboration, Analytical Thinking
AI Tools:	ChatGPT, Claude, GitHub Copilot, Gemini, OpenAI Codex, Google Antigravity

WORK EXPERIENCE

Software Developer *Jan 2025 – Present*

Matt Engineering Solutions | Nagercoil, TN

- Worked on two full-stack production projects: MIP Matrimony Platform and a Project Management System used in live environments.
- Developed and maintained user-facing features, admin modules, authentication systems, and database operations for both applications.
- Built secure login, role-based access control, profile management, matching workflows, notifications, employee management, task tracking, and team collaboration features.
- Participated in the complete Software Development Life Cycle (SDLC), including requirement analysis, development, testing, debugging, and deployment.
- Collaborated with team members using Git version control, resolving bugs, managing feature updates, and improving overall application performance and stability.

PROJECTS

Matrimony Platform

Tech Stack: Next.js 16, React 19, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, NextAuth, React Hook Form, Zod, Cloudinary, Razorpay, Nodemailer, PDFKit, Zustand, Lucide React

Full Project Workflow

- User registers or logs in to the platform and completes secure account verification.
- User creates a detailed matrimonial profile with personal, family, education, career, lifestyle, horoscope, and partner preference details.
- User browses profiles, applies search filters, views suggested matches, and sends likes to interested profiles.
- When both users like each other, the system creates a mutual match and moves them to the matched profiles section.
- Locked profiles can be unlocked through the payment process, after which full profile details and contact information become visible.
- Users can chat securely with matched or unlocked profiles and receive notifications for important activities.

- Admin manages users, profiles, matches, payments, pricing, notifications, deleted records, and landing page content from a separate dashboard.

Project Management System

Tech Stack: Next.js, React, TypeScript, Prisma, PostgreSQL, NextAuth, bcryptjs, Tailwind CSS, Radix UI, react-hook-form, Zod, Recharts, date-fns, Sonner, next-themes.

Full Project Workflow

- **Login & Security**
  Users log in using NextAuth credentials. Middleware and backend permission checks protect all secure pages and actions.
- **Roles & Permissions**
  The system has ADMIN, BA, TEAMLEADER, and EMPLOYEE roles with module, action, record, and field-level permissions.
- **Admin Setup Flow**
  Admin creates employees, departments, teams, positions, and clients before using CRM and project modules.
- **CRM & Sales Flow**
  Flow is:
  Client -> Lead -> Quotation -> Invoice -> Payment
  Only confirmed/sent quotations can create invoices.
- **Project & Task Flow**
  Admin creates projects, assigns teams, creates tasks, milestones, and sprints, while employees update task progress and daily work.
- **Time Tracking & Reports**
  Employees log work hours through time_entries, and the system uses that data for dashboards, reports, schedules, and activity tracking.
